

Codebook: Oregon Health Insurance Experiment, State Programs Variables

This codebook lists all of the publicly available variables pertaining to state programs (Medicaid, Supplemental Nutrition Assistance Program, and Temporary Assistance to Needy Families) that are necessary to replicate the results of the Oregon Health Insurance Experiment presented in Finkelstein et al (2012). The codebook has two sections. In the first section, variable name, label, and number of non-missing values are given. Where applicable, the text of the survey question and/or notes on variable construction are given immediately following the variable. In the second section, variable name, label, and any relevant survey question text are given along with descriptive statistics.
